

Portfolio Summary

Portfolio Name	Currency	Hist. Yield	Portfolio Expense	FE Risk Score
3- Low Risk Portfolio	GBP	2.47	0.64	36

Portfolio Expense - The portfolio expense is calculated using the weighted value of the OCF of the portfolio constituents. Where the OCF is not available the TER is used.
Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history.

Volatility

Standard deviation is a statistical measurement which, when applied to an investment fund, expresses its volatility, or risk. It shows how widely a range of returns varied from the fund's average return over a particular period.

Maximum Gain

Represents the best running return over a specified period. E.g. The longest running consecutive gain without making a loss.

Maximum Loss

Represents the worst running return over a specified period. E.g. The longest running consecutive loss without making a gain.

Negative Periods

Indicates number of negative monthly returns during the specified period.

Positive Periods

Indicates number of positive monthly returns during the specified period.
